

Star Wellness and Care Foundation has organised a Health Camp for Construction Workers (WABAG) at Rithala with the noble purpose of creating awareness among the masses for preventive healthcare, as there is nothing which is more important than good health. Test which are performed CBC, Blood Sugar Random, BP Monitoring. Happy to see them taking preventive steps towards health.

“The free health check-up camp will go a long way in instilling health consciousness and ensuring preventive measures against several diseases. The initiative underscores our commitment to ensure the well-being of the marginalized.

Most of these unorganized construction workers are come from different villages of the country. They have to work 10-12 h/day to fulfil the requirements within very short period. There is a need to assess the risk factors and control measure for ensuring health and safety of the workers.

The Campaign aimed at providing Preventive Health Check-Up facilities to identify people in an apparently healthy population who are at higher risk of a health problem or a condition, so that an early treatment or intervention can be offered and thereby reduce the incidence and/or mortality of the health problem or condition within the population.
