

Live healthy, stay young at heart

Cardiovascular disease, (CVDs) such as Ischaemic heart disease and cerebrovascular such as stroke account for 17.7 million deaths and are the leading cause. In accordance with the World Health Organization, India accounts for one-fifth of these deaths worldwide especially in younger population.

On the occasion of World Heart Day, 29th September`2021 Star Foundation in association with its Corporate Partner Star Imaging & Path Labs, undertook a campaign to disseminate information on the ways to maintain a healthy heart and provide free health consultation. Our team of cardiologists conducted several tests like calcium scoring screening test, echo cardiograph.

Star wellness and care Foundation prioritizes on health issues awareness and advocacy as per the identified target community group.

Personalized consultation sessions on Cardiovascular diseases (CVD), like heart attack, stroke, heart failure etc. was provided so as to promote preventive steps and changes in lifestyle to avoid any symptoms and pre-mature deaths related to such diseases.

Dr. Rameshwar Kr. Bishnoi, Cardiologist (DM & MD) were the Chief Guest for the consultation camp. Altogether 45 patients registered themselves and availed the free heart check-up, along with consultation from the heart specialist doctors in this day long camp.

Early detection prevents complication. This was our motive to conduct the camp and bring some meaningful change in individuals' life and improved health.
