

Radio Diagnosis for Thalassemia

Thalassemia is a blood disorder passed down through families (inherited) in which the body makes an abnormal form or inadequate amount of haemoglobin which is the protein in red blood cells that carries oxygen. The disorder results in large numbers of red blood cells being destroyed, which leads to anaemia.

Star Wellness and care foundation has conducted a camp for around targeted 25 beneficiaries to trace the status of Thalassemia at Tilak Nagar on 8th August`21. A training programme on “**Radio diagnosis of MRI T2* Iron Studies**” was also conducted by Star Foundation in association with Star Imaging & Path Lab and National Thalassemia Welfare Society at 4B/4, Tilak Nagar, New Delhi on the same day under the supervision and guidance of Dr. Sameer Bhati, Founder, Star Foundation, Dr. Sameer Sood, Chief Radiologist, Star Imaging & Path Lab and Dr. J.S. Arora, General Secretary, National Thalassemia Welfare Society.
